Google STEP Internship

Google aspires to be an organization that reflects the globally diverse audience that our search engine and tools serve. STEP (Student Training in Engineering Program) is a full time internship where you will be assigned a project and have hands on experience working at Google. For those that want additional training, we provide an optional development course that covers the fundamentals of coding.

If you are interested in Computer Science or Software Engineering, this is a great opportunity for you to develop your skills!

We have STEP Online Challenge Practice Rounds so please sign up here !
